## Professional Summary

MCA student specializing in Data Analytics and Machine Learning with hands-on experience in Python, SQL, Power BI, and predictive modeling. Built end-to-end analytics projects involving EDA, dashboard development, and machine learning to derive actionable business insights.

## Education

|                                                                           |                |
|---------------------------------------------------------------------------|----------------|
| <b>K.R. Mangalam University</b><br>Master of Computer Applications (MCA)  | 2025 – Present |
| <b>University of Rajasthan</b><br>Bachelor of Computer Applications (BCA) | 2021 – 2024    |

## Technical Skills

**Programming:** Python, SQL  
**Libraries:** Pandas, NumPy, Matplotlib, Seaborn  
**Visualization:** Power BI, Microsoft Excel  
**Machine Learning:** Scikit-learn, Model Evaluation, Classification  
**Data Analytics:** EDA, Data Cleaning, Data Preprocessing, Feature Engineering  
**Tools:** Git, GitHub, VS Code, Jupyter Notebook

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>S&amp;P 500 Stock Market Prediction</b><br><ul style="list-style-type: none"><li>Built a Random Forest classifier using 5000+ historical SP 500 records and achieved 78</li><li>Cleaned and preprocessed 5,000+ stock records and engineered 10+ technical features to improve model performance.</li><li>Validated model performance using train-test split and deployed a Streamlit application enabling real-time prediction through an interactive dashboard.</li><li><b>Tech Stack:</b> Python, Pandas, NumPy, Scikit-learn, Streamlit, Yahoo Finance API.</li></ul>                                                | GitHub — Live |
| <b>Customer Shopping Behavior Analysis</b><br><ul style="list-style-type: none"><li>Cleaned and analyzed a dataset containing 3,900+ customer purchase records to identify shopping trends and customer behavior.</li><li>Performed exploratory data analysis using Python and generated 15+ visualizations to identify sales trends and purchasing patterns.</li><li>Designed an interactive Power BI dashboard with 8+ KPIs, customer segmentation, and sales trend analysis, improving business insight visualization.</li><li><b>Tech Stack:</b> Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel.</li></ul> | GitHub        |

## Certifications

- Machine Learning with Python – IBM Cognitive Class
- Microsoft Excel – Coursera
- Deloitte Data Analytics Job Simulation – Forage
- Quantitative Research Job Simulation – Forage

## Achievements

- Built end-to-end machine learning and data analytics projects using Python and Power BI.
- Created interactive dashboards to visualize business insights and support data-driven decision-making.
